

**INSTRUCTIONS FOR USING
ST. JUDE MEDICAL'S
CARDIAC ANIMATIONS IN YOUR PRESENTATIONS**

REV. 4/10/08

Please use the following instructions if you would like to use any of our cardiac animations (.wmv files) in your presentations:

1. Click on the 'Download' button to the right of the file name
2. Then, in Microsoft PowerPoint, select a slide layout that has a movie (or media clip) in it.
3. Click on the icon on the slide and it opens a box for you to select a clip. At the bottom of that box there is an "import" button that will let you select this file from your desktop (or wherever you have saved it).
4. A dialogue box will open that asks how you want it to start to play and we suggest that you pick "automatically". If you would like to loop the animation right-click on the still image, select "edit movie object" and check the box by "loop until stopped" When in slideshow mode this will start the animation when you are on that slide and stop when you progress to the next slide.
