

Hospitals are required to report the device category C codes on claims when used in conjunction with procedures billed and paid under the Medicare hospital outpatient prospective payment system (OPPS) in order to improve the claims data used annually to update the OPPS payment rates. Procedure-to-device code edits look at the procedure code billed and return the claim if the dominant device required to perform the service is not also billed on the same claim. Device-to-procedure code edits look at the device code billed and return the claim if a procedure in which the device is used is not also billed on the same claim. These edits can be found at:

http://www.cms.hhs.gov/HospitalOutpatientPPS/02_device_procedure.asp#TopOfPage

C codes do not exist for devices utilized for inpatient-only procedures such as valve replacement procedures.
